

YO

YoCoin
(BEP20)

A Safe, Secure, Eco-Friendly, DeFi Cryptocurrency
Engineered with the Lowest Trading Fees available
and Automatic Rewards for Life

WHITEPAPER

LAUNCH DATE: 06.03.21
UPDATED: 13.11.21

MISSION

YoCoin (YOCO) creates a better future for its community members by prioritizing the needs of YOCO holders. It is built on a self-sustainable system that is designed to last indefinitely. Extremely low fees encourage trading while rewards incentivize holding.

It is no secret that powerful financial institutions have entered the cryptocurrency market—manipulating prices and working overtime to prevent true price discovery. These entities have little regard for the retail holder. At the same time, celebrities and organized groups with large followings have taken full advantage of market activity and volatility with no regard for the people they're hurting financially.

YOCO developers aim to achieve secure and stable Decentralized Finance (DeFi) with a brand-new coin, YOCO. Our community is the change the market needs.

Founded, developed, and marketed by retail investors, YOCO aims to keep dreams alive by restoring the confidence of and bringing together like-minded individuals who seek short- and long-term cryptocurrency stability.

YOCO is fully emancipated from institutional money and not associated with exploitive projects. Its holders are market makers—not market breakers. Institutional money fears us, because YOCO is not their coin. It's YOUR coin. OUR coin. YoCoin.

TOKENOMICS

YOCO is an auto-rewarding deflationary token on the Binance Smart Chain that generates rewards for its holders.

A 3% transaction tax is coded into the smart contract to ensure project longevity and deliver on our promise to the community. We promise to deliver a completely transparent and DeFi project positioned to attract investors by delivering a safe, rug-proof coin with a wealth of utility cases.

1% is burned forever, increasing YOCO's value. As supply decreases, YOCO demand surges. 1% is sent to a wallet for YOCO.finance development and marketing. Having the resources necessary to deliver a meticulously marketed project such as professional branding, paid influencers, and merchandise gives YOCO the ability for substantial growth.

The remaining 1% is redistributed instantly with every transaction on the network to all YOCO holders to incentivize long-term holding. No staking or lock-up period is required. These rewards are for life!

DYNAMIC LIQUIDITY POOLS

Liquidity is spread among multiple wallets to ensure transaction efficiency and uphold our mission of creating a community coin.

YOCO's unique liquidity structure prevents price impact issues and allows seamless swaps throughout multiple DEX's within the Binance Smart Chain. To set us apart from other projects engaged in pre-sale liquidity set-ups and locked Dapp pool exploitation, YOCO ensures the project's safety with a unique and dynamic liquidity structure.

Liquidity pools can be monitored via:

<https://bscscan.com/token/0x3788b33b69c1eba76602628fb41451afaabbe3b6#balances>

Liquidity wallets are traceable and fully transparent via BSCscan, so YOCO investors know their funds are 'SAFU' with YOCO.

FAIR LAUNCH

YOCO developers rigorously tested wallet-to-wallet send and receive transactions during pre-launch to ensure YOCO functions fairly and responsibly.

We tested small and large YOCO transactions and received excellent instantaneous results. After this testing phase was complete and the developers were satisfied with the performance, YOCO was fair-launched on the Binance Smart Chain via PancakeSwap on June 3rd.

YOCO did not host a pre-sale event or openly invite others to our community. This ensured a true community coin that is available to everyone at a fair price.

ROADMAP

PHASE 1

- ⊗ Smart contract development.
- ⊗ Testing.
- ⊗ Fair launch on the Binance Smart Chain.
- ⊗ Grassroots community development.
- ⊗ First wave of marketing across all major social media outlets.
- ⊗ Airdrops to active community members to engage new investors and set up for the SSC.

PHASE 2

- ⊗ Submit to sites for listing.
- ⊗ Second wave of marketing including hiring of social media influencers.
- ⊗ Online merchandise shop.
- ⊗ Directory of affiliates that accept YOCO.
- ⊗ Initiate monthly burns for twelve (12) months.
Launch NFT Collection.

PHASE 3

Major exchange listings.

Explore partnerships with existing businesses to accept YOCO as a supplemental payment method.

Integration of payments system in website.

Initiate community voting on the future direction of YoCoin.
including burns, advertising ventures, and case uses.

PHASE 4

Integration of a third-party payment system to purchase YOCO.

P2P Marketplace.

Implement YOCO as a form of payment in the YOCO merchandise shop.
